## Specialty House Calls Explained

### Service / Benefit

### Explanation of Benefits

#### FC2 Specialty House Calls

Home Medical Care not covered by Medicare (acute medical care at home) – **Florida Complete Care Specialty House Calls benefit covers medical care in the member’s home that is not otherwise covered by Medicare when found medically appropriate by a physician** based on the member’s health status, to provide with an alternative to receiving or continuing to receive acute care a member needs in a hospital.

A member may be referred to one of Florida Complete Care’s contracted in-home specialty care hospitalist providers to receive the following non-Medicare covered hospital services at home. Hospital services in the home allows for certain health care services to be provided outside of a traditional hospital setting and within the member’s home. Care begins after a contracted provider has evaluated and determined the member to be eligible, and the contracted provider refers the member. The Florida Complete Care contracted provider will consider the member’s eligibility criteria including medical conditions, and geographic location. No emergency room or inpatient visit is required to begin treatment. The member will receive treatment and monitoring at home from a team of providers for up to 30 day episode of care. **Prior authorization requirements apply.**
