Section 1 – Introduction

This directory provides a list of Florida Complete Care's network providers.

You will have to choose one of our network providers listed in this directory to be your **P**rimary **C**are **P**rovider **(PCP)**. Generally, you must get your health care services from your PCP. Your PCP will provide most of your care and will help you arrange or coordinate the rest of the covered services you get as a member of our Plan.

The network providers listed in this directory have agreed to provide you with your health care, vision and dental services. You may go to any of our network providers listed in this directory; however, some services may require a referral. If your PCP thinks that you need specialized treatment, he/she will give you a referral (approval in advance) to see a plan specialist or certain other providers. For some types of referrals your PCP may need to get an approval in advance from our plan (this is called obtaining "prior authorization"). If you are seeing a specialist for your care, you may need to return to your PCP for a referral for additional services. It is very important to get a referral (approval in advance) from your PCP before you see a plan specialist or certain other providers. If you don't have a referral (approval in advance) before you get services from a specialist, you may have to pay for these services yourself.

You must use network providers except in emergency or urgent care situations or for out-of-area renal dialysis or other services. If you obtain routine care from out-of-network providers, neither Medicare nor your plan will be responsible for the costs. Your PCP or the plan must give you a referral (approval in advance) before you can use providers not in the plan's network. Failure to receive a referral before you obtain these services from an out-of-network provider may result in you having to pay for the services yourself. For some services, your doctor may need to get approval in advance from our plan (this is called getting "prior authorization"). See Chapter 4, Section 2.1 in your Evidence of Coverage on our plan website at www.FC2Healthplan.com for more information about which services require prior authorization. The following are examples of services you may obtain from out-of-network providers:

- Emergency or urgently needed services. If you use an out-of-network provider for emergency care or urgently needed services, you will pay the same as you would pay if you got the care from a network provider. See Section 3 of your Evidence of Coverage for more information.
- Kidney dialysis services that you get from an out-of-network, Medicare-certified dialysis facility. If you use an out-of-network provider for kidney dialysis services, you will pay the same as you would pay if you got the care from a network provider. See Section 2.2 of this chapter for more information.
- When providers of specialized services are not available in our network. If you need medical care that Medicare requires our plan to cover and the providers in our network cannot provide this care, you can get this care from an out-of-network provider. Authorization must be obtained from the plan prior to seeking care. In this situation, you will pay the same as you would pay if you got the care from a network provider. For information about getting approval to see an out-of-network doctor, talk to your PCP.

If you have any questions about whether we will pay for any medical service or care that you are considering, you have the right to ask us whether we will cover it before you get it. You also have the right to ask for this in writing. If we say we will not cover your services, you have the right to appeal our decision not to cover your care.
